

FULL STACK ENGINEER

Full Stack Engineer with 4 years of experience building scalable web applications using React, Node.js, TypeScript, and MERN-stack technologies.

Experienced in banking and financial environments, developing secure APIs, optimizing frontend performance, implementing testing strategies, and contributing to CI/CD and deployment workflows. Strong background in Agile development, cross-functional collaboration, and modern engineering best practices.

TECHNICAL SKILLS

- Frontend: React.js, Next.js, Redux, Context API, TypeScript, JavaScript (ES6+), Tailwind
- Backend: Node.js, Express, REST/GraphQL, JWT Authentication
- Testing: Jest, React Testing Library, Selenium, Postman
- Databases: MongoDB, PostgreSQL, SQL
- Cloud & DevOps: AWS, Docker, Git, GitHub, CI/CD, Jenkins
- Best Practices: React performance optimization (memoization, lazy loading), accessibility, code reviews, caching

EXPERIENCE

Full Stack Engineer

DEXTRA TECHNOLOGIES A DELOITTE BUSINESS

2022 - PRESENT

- Strongly contributed to development efforts for MERN-stack applications serving financial industry clients, focusing on scalability, maintainability, and testing quality.
- Improved bug tracking and issue resolution workflows through enhanced Jira reporting and testing practices.
- Optimized and refactored existing code while incorporating test cases, achieving over 85% test coverage for both React and Java projects.
- Created reusable components with state management for ecommerce web app, allowing standardization on styling and when adding components in other screens.

Software Engineer / Full Stack Engineer

SOFTTEK

2022-2023

- Created the Client and Loan RESTful APIs and integrated them into the client's legacy platform while maintaining over 85% test coverage.
- Developed an internal deployment tracking platform for Android and iOS artifacts, reducing deployment inconsistencies by 25% and improving release reliability.
- Implemented backend services in Node.js, including secure authentication via JSON Web Tokens (JWT), which alleviated login issues for 20% of users.

Web Developer

MICRONICS MX

2021-2022

- Collaborated to create new websites and refactor inefficient code, resulting in a 20% improvement in page load speed.
- Developed and maintained websites utilizing JavaScript, HTML, CSS, and WordPress, which led to a 40% reduction in client feedback.

EDUCATION

2018 - 2021

TEC DE MONTERREY

B.S. in Computer Science and Technology, Engineering
